

Transition Options 03-04 BTSA- Induction Programs

BTSA Programs and BTSA-Induction Programs

Once a BTSA program submits the SB 2042 Professional Teacher Induction Program document, the program may begin offering the Induction program to participating teachers with the understanding that as the document moves through the reading process, adjustments may need to be made in the Induction Program.

Once a BTSA-Induction program is approved by the California Commission on Teacher Credentialing, the program must begin offering the Induction program as described in the approved SB 2042 Induction submission document. This is for teachers holding preliminary Multiple and Single Subject Credentials seeking to complete requirements for the professional clear credential. It is understood that offering a fully developed 2-year Induction program from the date of program approval is not realistic. Instead, programs should be ramping up to offering a fully developed Induction Program by Fall 2004 at the latest.

All current BTSA programs will have submitted the SB 2042 Induction Submission document by October 2003. All current BTSA Programs will have completed the document review process by June 2004.

Participating Teacher options

A participating teacher in his or her second year in your BTSA program should have the option to complete the BTSA program without adding on the SB 2042 Induction Program requirements. But if the participating teacher wants to use the completion of your **Induction Program** to satisfy the requirements for the Professional Clear Credential (in lieu of the 3 university courses), then the teacher may be transitioned to the Induction Program but **must complete ALL of the SB 2042 Induction program requirements**.

If you have certification requirement questions regarding a specific individual, please contact the CCTC Certification Division
